Image may vary according to local requirements

Application

Sterillium® is suitable for both hygienic and surgical hand disinfection. Sterillium® is used as a ready-to-use alcohol-based rub-in product – independently of water and wash basin – to prevent infection in all areas of health-care and industry where hygiene is important as well as in home dialysis and when travelling. Sterillium® not only feels great on the hands, but also increases skin hydration the skin with regular use.

Directions for use

Hygienic hand disinfection: Apply sufficient amount (min. 3 ml) of undiluted hand disinfectant to the cupped hand so that all areas of the hands can be wetted thoroughly and completely. Carefully rub in hand disinfectant for 30 seconds – cover all areas of skin.

Surgical hand disinfection: Thoroughly rub Sterillium® into hands and forearms up to the elbows. When treating hands, pay particular attention to fingertips, palms and thumbs. Hands and forearms are to be kept wet during the entire application time of 1.5 minutes.
